THE 1952 PLAN FOR NEW TRAINEES IN KREIS HILDBURGHAUSEN (Lapp; German; [REDACTED])

25X1X

This document is a tabular typewritten report from the Hildburghausen office of the Thuringen Chamber for Industry and Trade to the Office for Labor and Social Welfare, Hildburghausen on (a) trainee requirements for 1952 in the non-people-owned enterprises and (b) the status of plan fulfillment in respect to personnel requirements in people-owned enterprises.

An introductory statement, two pages, points out that private industry is having great difficulty; i.e., only 11 small factories are left in private hands in the metal industry, and since they have few contracts they will hardly be able to attract new trainees; the clothing factory of Ott & Co. will ~~probably~~ probably have to lay off workers because the plant has no contracts, etc.

(a) These tables, eight pages, outline the trainee status and requirements for 1952 in the various non-people-owned industries, i.e., building industry, agriculture, transportation, commerce, industry (private), services and administration, and trades. The tables have the following headings: (1) Consecutive No., (2) Designation, (3) Indication of breakdown, by number, or in percent, (4) for 1951, (5) for 1952, (6) Control Figure.

(b) The first three tables, three pages, list the quota and actual number of male and female workers in the various people-owned enterprises as of 15 August 1951, first separately, then in synoptic form. Another table lists the results of a circular letter concerning trainees for the Maduette in Unterwellenborn sent on 20 July 1951 to the following offices: Altenburg, Arnstadt, Eisenach, Erfurt, Gera, Gotha, Heiligenstadt, Hildburghausen, Jena, Meiningen, Muehlhausen, Nordhausen, Saalfeld, Sonnerhausen, Sonneburg, Suhl, Weimar. A final tabulation shows that there are 11 apprentice schools in Kreis Hildburghausen with 373 apprentices; 5 plant trade schools with 647 students; 6 trade schools with 4,058 students; 5 MAS/VEG (Machine Rental Station/People-Owned Farms) with 29 apprentices.
